

Online Summer Training Programme

Organized by

Enviro Informatics & Solutions

About Us:

Enviro Informatics & Solutions LLP (ISO 9001:2015 certified) is a young organization led by a group of scientists and academicians with global experience, distinct disciplinary approach & expertise, working towards a unified goal to inculcate sustainability for the generations to come. We aim to establish synergy among academia and the industry to enlighten and inspire the youth. Our thrust is in the domain of Earth and Environment, thriving for a connect between academia and industry.

Rationale of the programme:

The ever-expanding cities and industrialization have a profound impact on climate, economies and nature. Given the urgent environmental issues our society is confronting, it is essential that an entire generation of students and researchers delve into environmental studies before completing their education and embarking on their professional paths.

Why should one participate:

This training programme is an internship/summer training in the domain of Earth and Environment, which emphasizes on **skill based learning through hands on training and real world applications**. The idea is to develop a holistic understanding of various concepts supplemented by interactive learning, and at the same time fulfil the partial requisites for the award of Post graduate and undergraduate degree.

Explore your interest in these thematic areas :

- ✓ **GIS & Remote Sensing Techniques**
- ✓ **Environmental Management**
- ✓ **Satellite Image Processing with Python**
- ✓ **Advanced Statistics for Environmental Pollution Studies with R**

Target participants and Eligibility
